PROFESSIONAL EXPERIENCE

Freelance - Independent Projects

Technical Lead / Senior Backend Engineer

Remote

Mar 2021 - Present

- Architected end-to-end backend infrastructure for **6+** independent platforms across FinTech, EdTech, and digitization, managing system design through production deployment.
- Scaled the Meta Wisdom backend to serve **1,000+** **concurrent** users at **380ms median latency** with zero failures, optimizing performance via Redis caching and Gunicorn tuning.
- Led the TradeModules infrastructure migration from Kubernetes to a leaner Docker-based deployment, delivering a production-grade, white-label trading platform for a licensed Vietnamese securities brokerage, maintaining zero reported incidents since go-live, and achieving **Top 50 at Startup Wheel**.
- Engineered the DigiSER master-slave architecture using Django and Vue 3, integrating offline OCR and bulk digital-signing tools to process **40,000-100,000+** files per batch.

VietNam Cloud Services - V!Studios

Senior Backend Developer

Vietnam

Jul 2020 - Present

- Built and maintained scalable backend services for 3 production-grade cloud platforms spanning document automation and luxury travel.
- Developed the Quiqtext serverless OCR pipeline leveraging AWS Textract and Lambda, successfully reducing document processing time by **80%**.
- Modernized the legacy Trade To Travel monolithic system to a decoupled Docker and Wagtail architecture, delivering seamless backend modernization with zero production downtime.
- Enforced code quality and reliable releases via CI/CD pipelines, Pytest, and Agile delivery, maintaining **>60%** test coverage.

PTSC - PetroVietnam Technical Services Corporation

IT Specialist

Vietnam

Oct 2015 - Jul 2020

- Architected an enterprise asset management system to replace manual tagging and paper-based tracking, assigning unique system IDs to computers, furniture, and equipment, and integrating endpoint monitoring to track real-time asset location and flag unauthorized software.
- Digitized manual, paper-based approval workflows (leave requests, supply requisitions) into an online system with multi-level electronic sign-off, eliminating sequential physical paperwork and accelerating cross-departmental approval cycles.

TECHNICAL SKILLS

- **Languages:** Python, Bash, JavaScript.
- **Backend & Frameworks:** FastAPI, Django, Wagtail, Serverless Framework, Vue 3, Inertia.js.
- **Databases:** PostgreSQL, TimescaleDB, MongoDB, Redis.
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, Textract), Docker, Kubernetes, CI/CD Pipelines, Bitbucket Pipelines.
- **Methodologies:** Agile, DevOps, TDD.

EDUCATION

Western Sydney University

MBA, Information & Communications Technology

Australia

2018 - 2020

Saigon Technology University

Engineer, Computer Science

Vietnam

2011 - 2015
